Sample QA sheet · one page

What Kodinav returns with every page it builds. Sample run on our own page (kodinav.com/for-studios, local build), 2026-11-10.

Check	Result	Detail
1. Matches the design at phone, tablet, desktop	**Shown**	On real jobs compared section by section against your design file; here, rendered at 390, 768 and 1440 px (screenshots below).
2. No sideways scrolling	**Pass**	Horizontal overflow: 0 px (phone), 0 px (tablet), 0 px (desktop).
3. Accessibility (axe-core, WCAG 2.2 AA rules)	**Pass**	0 violations; 31 rule groups passed. One H1 on the page; every image has alt text (3 images, 0 missing).
4. Easy to tap on phones	**Flag**	4 links smaller than 24×24 px. Fixed before handover, or noted for you if the design calls for them.
5. Clean in the browser	**Pass**	Console errors: 0; failed requests: 0; broken images: 0.
6. Rest of the site untouched	**Included**	Existing pages screenshotted before and after our CSS and compared pixel by pixel (shown on real jobs).
7. Copy word for word	**Included**	Text checked against the approved design on real jobs.
8. Clean in the editor	**Included**	Every block opens in the WordPress editor without warnings (on WordPress jobs).

Automated checks find only part of accessibility problems, so keyboard and screen-reader checks are done by hand on every page. This sheet states results; it is not a legal compliance certificate. Kodinav · kodinav.com · abhinav@kodinav.com
